

# Information Technology Policy Policy and Procedures for Protecting Commonwealth Electronic Data

Number ITP-SEC019

**Effective Date** November 16, 2007

Category Security Supersedes None

Contact RA-ITCentral@pa.gov Scheduled Review April 2024

# 1. Purpose

This Information Technology Policy (ITP) addresses the policies and procedures for the safe transmittal, transport, storage, and overall protection of Commonwealth electronic data.

#### 2. Scope

This ITP applies to all offices, departments, boards, commissions, and councils under the Governor's jurisdiction and any other entity connecting to the Commonwealth Network (hereinafter, referred to as "agencies").

Third-party vendors, licensors, contractors, or suppliers shall meet the policy requirements of this ITP as outlined in the Responsibilities section.

#### 3. Background

There are many forms of electronic records within the Commonwealth that require special treatment or heightened protections. These types of electronic records are known as closed or "C" <u>Classification</u> records.

Another form of electronic records is <u>Public Records</u>, also known as Open Records. For policy guidance on the handling of Public Records, refer to <u>Management Directive 205.36, Right-to-Know Law Compliance</u> and <u>Management</u> <u>Directive 210.5, The Commonwealth of Pennsylvania State Records Management</u> <u>Program</u>. A data classification table listing any protection requirements for Public Records can be found in Section 6A of this ITP (*Policy, Data Classification Tables*).

Commonwealth employees and contractors shall identify the Classification of electronic records consistent with <u>ITP-INF015, Policy and Procedures for</u>

<u>Identifying, Classifying, and Categorizing Commonwealth Electronic Data</u> and protect this information from improper disclosure based on the Classification of the records.

<u>Categorization</u> of data will follow the <u>NIST SP 800-60 Rev 1</u> terminology, leveraging the security impact levels for data types and information systems. This activity determines the level of security controls to be implemented from <u>NIST SP 800-53 Rev 5</u>.

# 4. Policy

# "C" Classification Records or Closed Records

The use of a "C" designation indicates that all or part of the record requires special treatment or heightened protections, including, but not limited to, non-disclosure to the public, non-disclosure to any person without a need to know, non-disclosure outside of certain workgroups, non-disclosure without certain prerequisites, etc. Agencies shall follow <u>ITP-INF015, Policy and Procedures for Identifying, Classifying, and Categorizing Commonwealth Electronic Data</u> for direction on classification.

Closed or "C" records shall be placed into one of the following Classifications:

- Sensitive Security Information
- Protected Information
- Privileged Information
- Prerequisite-Required Information

# 5. Procedures

- Agencies shall categorize and classify all data pursuant with <u>ITP-INF015, Policy and</u> <u>Procedures for Identifying, Classifying, and Categorizing Commonwealth Electronic</u> <u>Data</u>.
- "C" designated electronic records shall be stored in an approved storage solution. Approved storage solutions include:
  - Commonwealth Enterprise Storage Solutions;
  - Agency On Premise Data Centers;
  - Commonwealth Data Centers; or
  - Other storage facilities approved in writing by the Agency Information Security Officer (ISO) or equivalent.
- No "C" designated electronic records can leave an approved storage solution without prior electronic approval from the Agency ISO or equivalent. Additionally, all requests for information relating to "C" designated electronic records must be made in writing to the Agency ISO.
- Encryption standards outlined in <u>ITP-SEC031, Encryption Standards</u> shall be followed for any actions that specify encrypting data under the "C" Classification.
- Encryption protection mechanisms detailed below in the Data Classification Tables shall be followed.
- Systems that store, process, transmit, or otherwise handle the following categories of data: Sensitive Security, Protected, or Privileged must be

protected with a Web Application Firewall (WAF) or Database Firewall (DBFW) as follows:

- WAFs must be utilized to protect Internet accessible web sites and services.
- DBFW must be utilized to protect Database related systems.
- Agencies designing modernized and new database-related systems shall include DBFW configurations to meet DBFW data owner requirements and future requirements to ensure the highest level of required security controls.
- Agencies shall evaluate the impact of third-party WAF and DBFW agents on their computing resources prior to the deployment of the WAF and DBFW agents.
- Systems that store, process, transmit, or otherwise handle prerequisite-Required or Public Records may be protected with a WAF or DBFW as follows:
  - $_{\odot}$   $\,$  WAFs may be utilized to protect Internet accessible web sites and services.
  - DBFW may be utilized to protect database related systems.
  - Agencies designing modernized and new database-related systems shall include DBFW configurations to meet DBFW data owner requirements and future requirements to ensure the highest level of required security controls.
  - Agencies shall evaluate the impact of third-party WAF and DBFW agents on their computing resources prior to the deployment of the WAF and DBFW agents.

## 6. Data Classification Tables

The following data Classification tables pertain to electronic records and details the requirements for the various levels of protection determined by the various forms of data and transmission methods pertaining to:

- Sensitive Security Information
- Protected Information
- Privileged Information
- Prerequisite-Required Information
- Public Records

#### SENSITIVE SECURITY INFORMATION

| Action                           | Requirement                                                                                                                                                                                             |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage on Fixed Media           | Encrypted                                                                                                                                                                                               |
| Storage on Exchangeable Media    | Encrypted                                                                                                                                                                                               |
| Creation of <u>Printed Media</u> | Information owner should designate which data is allowed to be further duplicated or distributed.                                                                                                       |
| Faxing                           | Transmitted over an encrypted link to a<br>password-protected mailbox or, if sent<br>to a public or multi-user fax machine,<br>received (printed) using Attended<br>Receipt                             |
| Sending by Public Network        | Encrypted                                                                                                                                                                                               |
| Sending over Agency Network      | Encrypted (refer to ITP-SEC031, Encryption Standards)                                                                                                                                                   |
| Disposal                         | Electronic data or media on which it is stored shall be<br>sanitized or destroyed per <u>ITP-SEC015, Data</u><br><u>Cleansing Policy</u> , subject to any applicable records<br>retention requirements. |

| Action                              | Requirement                                                                                                                                    |  |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Release to Third Parties            | Owner approval and Non-Disclosure Agreement prior to release. Must be provided to third-party via an approved action that provides encryption. |  |
| Electronic Media Labeling           | External and Internal Labels                                                                                                                   |  |
| Required                            |                                                                                                                                                |  |
| Internal and External email         | Addressed to Specific Person but Label only on Inside.                                                                                         |  |
|                                     | Email must be encrypted.                                                                                                                       |  |
| Packaging                           | Security Envelope                                                                                                                              |  |
| Granting Access Rights              | Data Owner Only                                                                                                                                |  |
| Tracking distribution and lifecycle | Ensure that the actions of individual information system                                                                                       |  |
| of electronic data                  | users can be uniquely traced to those users so they can                                                                                        |  |
|                                     | be held accountable for their actions.                                                                                                         |  |
| Web Application Firewall or         | Required (for Web Applications/Services or Database                                                                                            |  |
| Database Firewall                   | systems)                                                                                                                                       |  |

# **PROTECTED INFORMATION**

| Action                              | Requirement                                                                      |  |  |
|-------------------------------------|----------------------------------------------------------------------------------|--|--|
| Storage on Fixed Media              | Encrypted                                                                        |  |  |
| Storage on Exchangeable Media       | Encrypted                                                                        |  |  |
| Creation of Printed Media           | Information owner should designate which data is allowed                         |  |  |
|                                     | to be further duplicated or distributed.                                         |  |  |
| Faxing                              | Transmitted over an encrypted link to a password-                                |  |  |
|                                     | protected mailbox or, if sent to a public or multi-                              |  |  |
|                                     | user fax machine, received (printed) using                                       |  |  |
|                                     | Attended Receipt                                                                 |  |  |
| Sending by Public Network           | Encrypted                                                                        |  |  |
| Sending over Agency Network         | Encrypted (refer to ITP-SEC031, Encryption                                       |  |  |
|                                     | <u>Standards)</u>                                                                |  |  |
| Disposal                            | Electronic data or media on which it is stored shall be                          |  |  |
|                                     | sanitized or destroyed per <u>ITP-SEC015, Data</u>                               |  |  |
|                                     | <u>Cleansing Policy</u> , subject to any applicable records                      |  |  |
| Delegante Third Decking             | retention- requirements                                                          |  |  |
| Release to Third Parties            | Owner approval and Non-Disclosure Agreement                                      |  |  |
|                                     | prior to release. Must be provided to third-party                                |  |  |
| Electronic Media Labeling Required  | via an approved action that provides encryption.<br>External and Internal Labels |  |  |

# 7. Responsibilities

#### 7.1 Agencies Shall:

Comply with the requirements as outlined in this ITP.

#### 7.2 Office of Administration, Office for Information Technology shall:

- Comply with the requirements as outlined in this ITP.
- Review this ITP annually as required by the Breach of Personal Information Notification Act, Act of November 3, 2022, P.L. 2139, No. 151, 73 P.S. §§ 2301-2330

#### 7.3 Third-party vendors, licensors, contractors, or suppliers shall:

- Utilize a WAF to protect data classified under this policy as Class "C", utilizing the standards set forth in <u>ITP-SEC004</u>, <u>Enterprise Web Application</u> <u>Firewall</u>.
- Encrypt "C" class data at rest to include, using encryption standards forth in <u>ITP-SEC031, Encryption Standards</u> and the <u>National Institute of Standards</u> and <u>Technology (NIST) Cryptographic Module Validation Program.</u>
  - For Criminal Justice Information, encryption must also meet <u>CJIS policy</u> requirements.
  - For systems receiving, processing, or storing Federal Tax Information (FTI), must meet <u>IRS Publication 1075</u> requirements.
