

# Information Technology Policy

## *Management of Electronic Information Created via Multi-Functional Devices or Other non-EDMS Desktop Scanners*

<b>ITP Number</b> ITP-INFRM007	<b>Effective Date</b> July 20, 2009
<b>Category Information</b>	<b>Supersedes</b> None
<b>Contact</b> <a href="mailto:RA-ITCentral@pa.gov">RA-ITCentral@pa.gov</a>	<b>Scheduled Review</b> June 2022

### 1. Purpose

This Information Technology Policy (ITP) establishes an enterprise-wide policy for all Commonwealth agencies pertaining to the management of electronic information that is created, stored, and/or maintained via [Multi-Functional Devices \(MFDs\)](#) or other non-Electronic Document Management System (EDMS) or Enterprise Content Management (ECM) desktop scanners.

Often non-EDMS/ECM scanners or MFDs are used to convert paper to an electronic file format. Information, including those scanned documents, shall be managed throughout its existence, from creation to final disposal; the same as any other electronic information.

### 2. Scope

This ITP applies to all offices, departments, boards, commissions and councils under the Governor's jurisdiction (hereinafter referred to as "agencies"). Agencies not under the Governor's jurisdiction are strongly encouraged to follow this ITP.

### 3. Definitions

**3.1 Electronic Document Management Systems (EDMS)** – The use of a computer system and software to store, manage and track electronic documents and electronic images of paper-based information captured through the use of a document scanner.

**3.2 Enterprise Content Management (ECM)** – The strategies, methods, and tools used to capture, manage, store, preserve, and deliver content and documents related to organizational processes.

### 4. Policy

Agencies shall carefully consider the creation of electronic information that is not stored or maintained by agency applications using applications and databases, EDMS, or ECM; of particular concern are electronic records that are generated via MFDs or other non-EDMS related desktop scanners.

#### Use of MFDs:

MFDs shall be used only for convenience purposes, (e.g., to route a copy of a document to another party) and not to store business records. MFDs shall be configured to wipe the hard drive on a daily basis. Cache shall reset daily and the retention set to 0 days. If these

parameters are not configurable, a product to wipe the hard drive shall be purchased to accomplish the task.

Agencies shall consider the following when utilizing MFDs for non-EDMS/ECM/[Database Management System \(DBMS\)](#) electronic documents:

- Quantity or volume issues
- No indexing capability
- No quality control capability
- Storage concerns
- No direct integration to an end EDMS/ECM application
- Format /migration issues
- Number of copies or backups
- Cost
- Security and privacy concerns
- Legal, audit, and business risks associated with keeping or losing records

When an agency's business processes have a need for scanning technology, the agency shall assess the entire business process in accordance with INFRM006 *Electronic Document Management Systems*. The assessment shall include the review of supplements STD-INFRM006A *File Formats Supported by Electronic Document Management Systems* for supported file formats, STD-INFRM006B *Electronic Document Management Product Standards* for product standards, and a completed evaluation form RFD- INFRM006C *EDMS Evaluation Questionnaire*. Likewise, the design of all systems and processes related to the record shall take into consideration results of the analysis. The analysis shall occur prior to procurement and the implementation of any new business activity and/or related information technology systems.
