1. **Purpose**

   Establishes procedures for the configuration and management of copier, fax, printer, and scanner equipment connected to commonwealth networks.

2. **Scope**

   This Information Technology Policy (ITP) applies to all departments, boards, commissions and councils under the Governor’s jurisdiction. Agencies not under the Governor’s jurisdiction are strongly encouraged to follow this ITP.

3. **Policy**

   All Multi-Function Devices connected to agency networks, including copier, fax, printer, and scanner equipment are to be managed by the agency IT staff, who will work with the current Commonwealth equipment provider to determine telecommunications equipment specifications, network connectivity requirements, and device configurations.

**Procurement of Multi-Function Devices (MFDs)**

Agencies are to procure MFDs through the Commonwealth Digital Multifunctional Devices contract 6100044411 (information can be found at [http://www.emarketplace.state.pa.us/](http://www.emarketplace.state.pa.us/)). All MFDs offered on this contract meet the Commonwealth’s required security specifications and are in compliance with this policy.

As part of the management for multifunction devices, the following technical concerns are to be addressed by the agency:

- IT departments are to create standards for network connectivity, security, user profiles, scan export resolution, and infrastructure-related configuration topics for devices connected to the network. If units are strictly stand-alone analog copiers not connected to a network, IT does not need be involved.
- Scanning resolutions for the device is to be set at a level that will not burden the agency’s network bandwidth and email storage capacity. Transmitting large files can cause networking issues and can degrade throughput. User-selected scanning options, such as high dpi settings, grayscale, and page sizing can cause file sizes to grow, potentially causing e-mail inboxes to reject the transmission due to file size limitations.
- Multi-function devices are often equipped with hard drives, which may contain data that is “cached” or stored during day-to-day use. Refer to ITP-SEC015 Commonwealth Data Cleansing Policy for procedures regarding data cleansing of these hard drives.
- Service calls for the equipment are the responsibility of the program area, unless there is a technical issue concerning network connectivity that needs to be addressed by the IT staff or the unit is being replaced.
• Administrative/procurement personnel are responsible for the purchasing and leasing of multi-function equipment, establishing user and business requirements, and other non-IT related matters.

Each agency is to assess its current print environment every two years to determine if any rightsizing or realignment of equipment is necessary. Guidelines and best practices to carry out this assessment are provided in the attached OPD-PLT002A, *Guidelines for Rightsizing the Office Print Environment*. All Office Class Print Devices are to be used as a Shared Resource and not exclusively assigned to any one individual.

Prior to deployment, agencies are to configure all printer devices with naming standards as directed in OPD-PLT002B *Printer Naming Standards*. (Refer to Section 6 for details)

**Note:** Printing of confidential information is no longer a valid justification for an individual having a personal printer. Current printer offerings include secure print technology that addresses this issue.

The type of print device, including department and location information, is to be kept on file and updated as necessary. Refer to OPD-PLT002A *Guidelines for Rightsizing the Office Print Environment*. The printer attribute information to be collected includes:

- Printer make, model, and type
- Print speed in pages per minute (PPM)
- Duty cycle (total monthly output capacity)
- Approximate age of device
- Auto-duplex capable (yes or no)
- Network capable (i.e., has its own network interface card and internet protocol address (yes or no))

Automatic-duplex (double-sided copying/printing) is to be included on all devices that have that capability available. Legacy printers that do not have this capability are to be contained and plans for a replacement to new technology need to be put into place.

Color print devices are to be managed and configured to only allow access only to the specific groups and users identified as having a valid business justification for color printing. The default print setting for these devices is to be black and white, requiring the user to manually choose the color selection when color printing is required.

4. **Responsibilities**

4.1 **Office of Administration, Office for Information Technology (OA/OIT)** shall provide purchasing quotes for multi-function devices as requested and configure the device to function on the network after it is delivered and set up. OA will monitor the devices on the network and correct any connectivity issues when they occur.

4.2 **Agencies** shall procure and manage all multi-function devices in accordance with this policy. Agencies are to develop and maintain an assessment process to be conducted every two years for all multi-function equipment managed by the agency. Agencies must comply with ITP-SEC015 *Data Cleansing Policy* when disposing of multi-function devices.
5. **Related ITPs/Other References**
Definitions of associated terms of this policy are published on the Office of Administration’s public portal: [http://www.oa.pa.gov/Policies/Pages/Glossary.aspx](http://www.oa.pa.gov/Policies/Pages/Glossary.aspx)

Commonwealth policies, including Executive Orders, Management Directives, and IT Policies are published on the Office of Administration’s public portal: [http://www.oa.pa.gov/Policies/Pages/default.aspx](http://www.oa.pa.gov/Policies/Pages/default.aspx)

6. **Authority**
Executive Order 2016-06 *Enterprise Information Technology Governance*

7. **Publication Version Control**
It is the user’s responsibility to ensure they have the latest version of this publication, which appears on [https://itcentral.pa.gov](https://itcentral.pa.gov) for Commonwealth personnel and on the Office of Administration public portal: [http://www.oa.pa.gov/Policies/Pages/default.aspx](http://www.oa.pa.gov/Policies/Pages/default.aspx). Questions regarding this publication are to be directed to RA-ITCentral@pa.gov.

8. **Exemption from This Policy**
In the event an agency chooses to seek an exemption from the guidance within this IT policy, a request for a policy waiver is to be submitted via the enterprise IT policy waiver process. Refer to [ITP-BUS004 IT Waiver Review Process](https://itcentral.pa.gov) for guidance.

This chart contains a history of this publication’s revisions. Redline documents detail the revisions and are available to CWOPA users only.
