1. **Purpose**
Provides guidelines for the exercise of agency discretion in creating policies and procedures on the proper electronic use and disclosure of Personally Identifiable Information (PII).

2. **Scope**
This Information Technology Policy (ITP) applies to all departments, boards, commissions and councils under the Governor’s jurisdiction. Agencies not under the Governor’s jurisdiction are strongly encouraged to follow this ITP.

3. **Definitions**

   3.1 **Data Breach:** A security incident in which personally identifiable information (PII) is copied, transmitted, viewed, stolen, or used by an individual unauthorized to do so.

   3.2 **Personally Identifiable Information (PII):** any information about an individual maintained by an agency, including (1) any information that can be used to distinguish or trace an individual’s identity, such as name, social security number, date and place of birth, mother’s maiden name, or biometric records; and (2) any other information that is linked or linkable to an individual, such as medical, educational, financial, and employment information.

By way of further example, PII includes:
- Driver's license number or a State identification card number issued in lieu of a driver's license,
- Passport number,
- Identifying information that must be protected under any policy, law or other requirement applicable to an agency.

4. **Policy**
The Office of Administration/Office for Information Technology (OA/OIT) is committed to protecting the privacy of Personally Identifiable Information (PII) of its employees, contractors, constituents, and other individuals associated with the Commonwealth. All entities under the Governor’s jurisdiction will take appropriate measures, implement necessary technology, and/or establish operating procedures to ensure data privacy is maintained. All applications collecting PII must comply with applicable laws and be vetted through the CA² process (detailed in ITP-SEC005 Commonwealth Application Certification and Accreditation).
**Identifying PII**

Agencies are responsible for identifying and classifying all PII generated, collected, stored, used, and disclosed by the agency or by a third party on the agency’s behalf. This data includes Sensitive Security Information, Protected Information, Privileged Information and Prerequisite-required information. Refer to ITP-SEC019 *Policy and Procedures for Protecting Commonwealth Electronic Data* for data classification guidance.

**Collecting PII**

Agencies must limit the generation, collection, storage, use, and disclosure of PII to that which is necessary for business purposes only, and must further limit generation, collection, storage, use and disclosure of PII to the *minimum* PII necessary for the accomplishment of those business purposes.

Systems which are vendor or agency hosted shall use PII as data elements only and not as keys to databases. PII may be used for identification purposes or as identifiers only to address a business necessity, and only if allowed by applicable law and/or regulations/mandates.

**Displaying PII**

Systems which are vendor or agency hosted shall not display PII visually, whether on computer monitors, or on printed forms or other system output, unless required by any law or other requirement applicable to an agency, or business necessity.

**PII Used in Test Environments**

PII data used in staging, development, or test environments (as well as production environments) shall be secured properly in accordance with commonwealth ITP’s and any law or other requirement applicable to an agency to prevent unauthorized use or disclosure. It is recommended that “simulated” PII data be used in test and development environments.

**Unique Identifiers**

Systems developed by an agency, third party or contracted provider or business partner that require a unique identifier shall not use PII as that identifier. All systems, which must assign an identifying number for an individual, must assign a unique identification number that is not the same as or cannot be traced back to users PII. Security must be applied, and care must be taken to ensure that access the electronic system and use of these unique identification numbers are restricted in accordance with any law or other requirement applicable to an agency.

**Transferring PII**

PII moved from one computer to another over an un-trusted network* must be transferred using encryption controls defined in ITP-SEC019 *Policy and Procedures for Protecting Commonwealth Electronic Data* to protect data integrity and confidentiality. Agency legal review may be required, and is otherwise recommended, to ensure appropriate limits and processes are applied to any PII data transfer between commonwealth agencies, business partners, or external entities.

*This requirement does not apply when transferring PII between two hosts on the same...
Maintaining PII

All agency entities maintaining files utilizing PII for any purpose shall ensure that access or use of such information is properly controlled, encrypted, and restricted to prevent unauthorized use or disclosure, and that the retention period is minimized based upon business necessity.

Legacy Systems

Owners of legacy information systems that use PII as keys or indexes in their databases and which are not specifically required to do so by any law, regulation, reporting requirement or other mandate must have an action plan and timeline for remediation.

Disclosure of PII

Data breaches involving PII must be reported via the requirements outlined in ITP-SEC024 - IT Security Incident Reporting Policy, regardless of other law or requirements that may be applicable to a breach. Breaches, for reporting under ITP-SEC024, include breaches of data in electronic or paper form. Agencies or business partners are also required to follow, as appropriate, any mandates pertaining to breaches found in any law or other requirement applicable to an agency.

5. Responsibilities

 Agencies are to put in place processes for ensuring that all users of agency systems are aware of the procedures and the importance of reporting security incidents (refer to ITP-SEC024 for guidance), data breaches, threats, or malfunctions that may have an impact on the security of agency information.

8. Publication Version Control
   It is the user’s responsibility to ensure they have the latest version of this publication, which appears on https://itcentral.pa.gov for Commonwealth personnel and on the Office of Administration public portal: http://www.oa.pa.gov/Policies/Pages/default.aspx. Questions regarding this publication are to be directed to RA-ITCentral@pa.gov.

9. Exemption from This Policy
   In the event an agency chooses to seek an exemption, for reasons such as the need to comply with requirements for a federally mandated system, a request for waiver may be submitted via the Commonwealth of PA Procurement and Architectural Review (COPPAR) process. Requests are to be entered into the COPPAR Tool located at http://coppar.oa.pa.gov/. Agency CIO approval is required.
