

# Information Technology Policy

## *Keystone Login and Identity Proofing*

<b>ITP Number</b> ITP-SEC039	<b>Effective Date</b> August 11, 2020
<b>Category</b> Security	<b>Supersedes</b> ITP-SEC013, ITP-SEC014
<b>Contact</b> <a href="mailto:RA-ITCentral@pa.gov">RA-ITCentral@pa.gov</a>	<b>Scheduled Review</b> September 2022

### 1. Purpose

This Information Technology Policy (ITP) is to establish and maintain a centralized account management system for online services for the Commonwealth and to establish standards for online identity proofing of public users accessing Commonwealth IT web services or online applications.

### 2. Scope

This ITP applies to all offices, departments, boards, commissions, and councils under the Governor's jurisdiction (hereinafter referred to as "agencies"). Agencies not under the Governor's jurisdiction are strongly encouraged to follow this ITP.

Third-party vendors, licensors, contractors, or suppliers shall meet the policy requirements of this ITP that are applicable to the products and services provided to the Commonwealth.

### 3. Definitions

**3.1 Keystone Login** - is an account management system for Commonwealth of Pennsylvania online services.

### 4. Policy

#### Keystone Login

All citizen facing applications are to use Keystone Login for [Authentication](#) services. Keystone Login is an account management system for Commonwealth of Pennsylvania online services. The Keystone Login portal provides the following capabilities: account creation and management, [Identity Verification](#), [Authentication](#) services and [Single Sign-On \(SSO\)](#) (sign on once to access multiple applications), social media login (e.g., Google), and risk-based multi-factor authentication. The Keystone Login provides citizens with a single credential (username and password) that can be used to access online services from multiple state agencies.

Keystone Login Accounts that have not been accessed in 18 months will be purged.

Connectivity specifications for Criminal Justice Information Systems utilizing Keystone Login are outlined in OPD-SEC039B – Authentication Requirements for Connectivity to Criminal Justice Information Systems.

## Identity Proofing

Identity Proofing is the process of verifying the real-life identify being claimed by a person. For purposes of this ITP, Identity Proofing shall be limited to identity proofing levels and corresponding authentication requirements. Authorization focused on the actions or activities the public user is permitted after authentication has occurred is outside of the scope of this ITP. This ITP DOES NOT seek to establish or to impose business requirements on agency applications or services, particularly with regard to authorization of a public user. Such requirements are left to the agency and/or the appropriate business unit within the agency to determine.

The following Levels of Assurance (LOA) are established for the Commonwealth:

**LOA1:** Self-asserted identity with little or no confidence in who the *person* behind the identity is. This is the lowest level of assurance and should only be used in circumstances where anonymous logons would be allowed and where the true identity of the person is irrelevant.

Examples of such use would include:

- 1.1 Portal logon to greet returning people
- 1.2 Dissemination of publicly available information
- 1.3 Preliminary application or registration for a program where the identity is established at a later step.

**LOA2:** Identity for which there is some level of confidence in who the *person* behind the identity is. The identity may be verified in a number of ways such as presentation of proofing materials (e.g. driver's license) or something that they have knowledge of (e.g. knowledge based Q&A). A minimum of user ID and password is sufficient for authentication and shall be in compliance with current Commonwealth password policies (ITP-SEC007 *Minimum Standards for User IDs and Passwords*). This level is generally sufficient for most online interactions.

## 5. Service Description

There are two options to interface agency applications with Keystone Login: Keystone Login Portal and a suite of Keystone Login [APIs](#) (Public and Private). The Public APIs are available for integration efforts with SaaS/COTs systems. The following list of functionalities is supported by either option:

**Account Creation and Management** – Keystone Login provides this functionality by interacting with the Commonwealth's only approved citizen-facing user account domain called SRPROD. Keystone Login allows citizens to create an account in the SRPROD domain, maintain that account by changing account information, and manage that account by adding other features to the account.

**Authentication** – Keystone Login provides this functionality by interacting with the citizen-facing user account domain and the Commonwealth employee account domain.

**Identity Verification** – Keystone Login allows SRPROD account owners to verify themselves as [LOA2](#) authenticated accounts.

**Multi-Factor Authentication Services (MFA)** – Keystone Login allows account owners

who have chosen to elevate their accounts to [LOA2](#), to also enable [MFA](#) on those accounts

**[Single Sign-On \(SSO\)](#)** – Keystone Login promotes a [SSO](#) experience.

Keystone Login also offers the ability to login using an existing Google social media account. This is available only by using the Keystone Login Portal, as it cannot be extended through an [API](#).

## 6. Responsibilities

**6.1 Agencies** shall comply with the requirements as outlined in this ITP.

**6.2 Office of Administration, Office of Information Technology** shall comply with the requirements as outlined in this ITP.

- **Service Owner** - Enterprise Information Security Office
- **Service Provider** - Enterprise Solutions Office

**6.3 Third-party vendors, licensors, contractors, or suppliers** shall comply with the requirements as outlined in this ITP.
